

Task Force on the Revision of the Postoperative Delirium Guideline

The Task Force on the revision of the Postoperative Delirium Guideline was established by the ESAIC to update the existing guideline on the prevention of postoperative delirium (POD), published in 2017. The 2017-guideline covers publications up to March 2015. Since then, more than 2,100 new articles on delirium in the peri-operative setting have been published. The revision of the guideline will be conducted in collaboration with representatives of other medical societies and provide practical recommendations for the whole spectrum of surgical patients from adulthood up to the geriatric age.

Task Force on the Revision of the Postoperative Delirium Guideline

Composition

Chairperson

Claudia Spies

Members of the Task Force

César Aldecoa
Gabriella Bettelli
Federico Bilotta
Robert David Sanders
