Dear Partners,

In the last years, ESAIC expanded the education offer and today provides to its members and community of anaesthesiologists and intensivists a wide range of activities.

We passed from a congress-center focus, where most of the content was delivered at our congresses, Euroanaesthesia and Focus Meeting on Perioperative Medicine, to a 365 approach, where content is delivered in different formats and to different targets throughout the year.

The pandemic has demonstrated that having an education and training strategy which is fit for the digital age is essential. At the same time, we acknowledge the importance of face-to-face education. With this in mind, we planned a series of activities in 2022, both online and face to face, to give the opportunity to all the members of our community to find the right path and tool to increase their knowledge.

In 2021, we made an educational need assessment among our members. The results were interesting and guided us to build the offer 2022.

This document is a preliminary overview of all the planned activities, which we hope will facilitate and boost our collaboration.

**Don’t miss the opportunity to become our partners in education!**

Prof. Stefan De Hert
Chair of the ESAIC Education and Training Committee

Education

Tuesday
Each Tuesday a new educational activity will be offered to ESAIC community members. This will include several formats, both formal and informal, aiming at different targets and focusing on a wide range of topics.

Throughout the year, our community members will be guided through a learning journey, that will allow them not only to improve technical and non-technical skills, but also to discover new trends, focus on hot topics, get in touch with speakers and peers to enlarge their network.

Our aim is to become the European reference for training in Anaesthesiology and Intensive Care – being part of the daily life of our community members.

All the material produced will be available afterwards on our Platforms (Academy and Library) for those who missed the live or want to review it later.

Education TUESDAY starts in January 2022. Book your calendar!
Theme of the month
Today's learners need more than skills training and knowledge updates. They need to feel a sense of purpose and connection. They need to see how training benefits them in a meaningful way.

At the same time, the digital age brings a seemingly endless number of options for today's learners and it is also easy to get lost.

This is the reason why ESAIC organises a Learning Pathway on a specific Theme that will last a month and include different formats.

A learning pathway is a carefully constructed road map that divides the whole course into chunks, with the aim to guide the learners through a complete training programme, which incorporates different pedagogical approaches that foster active learning and critical thinking.

ESAIC offers a Comprehensive Educational Online Pathway focusing on a compelling topic for a whole month: 1 Month, 1 Theme – 4 Learning Stages.

The first Theme Month will be organised in November 2022 on the theme of Obstetric Safety.

1 MONTH, 1 THEME → 4 LEARNING STAGES.

1 Pre-Learning Stage
To get end-users interested in the topic

2 The Learning Stage
Allow more time to focus on difficult and/or complex concepts

3 The Training Stage
New skills are introduced, and end users have a chance to practice these new skills

4 The Final Stage
To clear doubts instantly, have meaningful interactions, and to make learning personal and relevant

This manual is updated regularly. Changes can occur due to Covid-related measures. All sponsorship must be Unrestricted Grants. All the programmes are preliminary.
1st TUESDAY
Pre-Learning Stage - Clinical Case Study

Format – interview with Faculty leader
- Presenting the whole month program
- Start with a clinical case
- Calls for reaction – ESAIC Academy Forum / Social media

Identify problems
To gauge existing knowledge of individuals and of the group
To gain a deeper understanding of learners and areas the training must focus on
To help personalize training

2nd TUESDAY
The Learning Stage - Guidelines

Format – Infographic / Short video / Voice over
- Interview
- Guidelines authors

Getting to know the new regulation / recommendation
Combine technology and the new preferences of learners
to deliver learning that stays

3rd TUESDAY
The Training Stage - Meet the Expert

Format – short interview with the Expert
- Communication
- Teamwork
- Decision making
- Cause of errors
- Providing the case solution

Subjects Matter
Teach learners new skills and the steps involved in a process
Helps learners practice the art of decision making
Case Solution
Add credibility to and stress on the importance of the training

4th TUESDAY
The Final Stage - Webinar

Format – Virtual Webinar
- Ties everything together
- The most curated activity
- With CME credits

Reinforce knowledge and skills that were imparted during training, and performance support as refreshers for complex concepts, procedures, and processes

This manual is updated regularly. Changes can occur due to Covid-related measures. All sponsorship must be Unrestricted Grants. All the programmes are preliminary.
SPONSORSHIP INCLUDES:

- Sponsor name is mentioned on ESAIC Academy
- Sponsor name is mentioned at the beginning of each event
- Sponsor logo/name 3 eblasts + Social Media
- Webinar report (1 week after the webinar w/CME)
- Webcast of the webinar is available on ESAIC Academy for 24 months
- Additional eblast is possible with additional cost
- Additional post survey to the participants is possible with additional cost

SPONSORSHIP IS LIMITED TO MAXIMUM 3 SPONSORS
Online Education
WEBINARS

A webinar is a 60-minute session organised on a specific topic and involving 1 chair and 2 speakers. In 2020 and 2021 ESAIC organised 21 webinars (6 dedicated to COVID during the first wave of Pandemic), creating 50,000 accesses of unique users to the Academy. Below are the planned webinars 2022.

MICROLEARNING MODULES

Microlearning is a modular delivery approach to online training where content is engineered into a series of short, concise, and dynamic learning moments, each a complete experience on its own while supporting the learning sequence as a whole. Each module is focused on meeting one specific learning outcome, by breaking down a large topic into numerous bite-sized modules.

- High Flow Nasal Oxygen Therapy (Sponsored)
- Patient Blood Management (Sponsored)
- Continuous and Remote Monitoring from Admission to Discharge (Sponsored)
- Continuous Home Care Monitoring (Sponsored)

We encourage you to visit ESAIC Academy and the Microlearning Modules already developed. Do not hesitate to contact us in the case you are interested in the development of a new Module.

This manual is updated regularly. Changes can occur due to Covid-related measures. All sponsorship must be Unrestricted Grants. All the programmes are preliminary.
SPONSORSHIP INCLUDES:

- Sponsor logo/name is mentioned on ESAIC Academy
- The module is permanently available on the Academy
- 1 eblast + Social Media
- Annual report about visitors/views (anonymous data, GDPR compliant)
- Additional eblast is possible with additional cost
- Additional survey to the participants is possible with additional cost

SPONSORSHIP IS LIMITED TO MAXIMUM 1 SPONSOR PER MODULE

This manual is updated regularly. Changes can occur due to Covid-related measures. All sponsorship must be Unrestricted Grants. All the programmes are preliminary.
INDUSTRY E-LEARNING MATERIALS

In the ESAIC Academy, there is a special section called “Sponsored Materials” where Partners can publish scientific presentations, lectures, or e-learning materials. Publication is submitted to the approval of the e-learning committee.

- The module is available on the Academy for 2 years
- 1 dedicated eblast + Social Media posts
- Annual report about visitors/views (anonymous data, GDPR compliant)
- Additional eblast is possible with additional cost
- Additional survey to the participants is possible with additional cost

This manual is updated regularly. Changes can occur due to Covid-related measures. All sponsorship must be Unrestricted Grants. All the programmes are preliminary.
What’s NEW?
PODCASTS

A podcast is an audio digital media, that is available in a series of episodes or parts and is streamed or downloaded by the end user over the Internet.

ESAIC started releasing podcasts in 2021, with a series linked to the European Journal of Anaesthesiologists, which have been very successful. You can find the podcasts here.

In 2022, new podcasts series will be launched, touching all the aspects of Anaesthesiology and Intensive Care, aimed at different targets. ESAIC Podcasts will be made available via a release schedule, presented below.

Each podcast topic is housed under a theme. The format is chosen by the Speaker and Host. There are a total of 5 themes which are presented below. Different podcast formats are used corresponding to various themes:

**Challenging Dogmas in...**
Challenging “dogmas” in Anaesthesiology, intensive care and related fields is important for the advancement and professional development. In each episode, speakers will identify a dogma that is interesting to challenge and discuss around it.

**Industry Corner**
One (or more) industry representative(s) will be invited to take part in the podcast, which is a great opportunity to discuss innovation, hot topics and future development. Those podcasts will be added to the production schedule upon requests. Industry can choose from all ESAIC formats or suggest a new format on their own.

**Ethical Dilemmas**
The pace and advancement of medicine never slows and our practice is sometimes not so much about what we can do, but what we should do. In an increasingly complex world we are asked to make decisions on life and death in highly emotional circumstances. We are asked to navigate a maze of emotions, families, patients and legalities in a way that our initial training never prepared us for. Our new podcast series will explore these dilemmas, challenge dogmas and prepare us for the uncertainties and advancements of 21st century medicine.

**Trainees Corner**
These podcasts are specifically aimed at trainees and young professionals and will feature conversations with experts, residency hacks, exam preparation, and career advice.

**ESAI Talks**
These podcasts, developed by members for members only, will feature conversational expert interviews on non-clinical competencies, skills, well-being, and best practices.

**History Break**
In each episode, a groundbreaking or defining moment within the history of Anaesthesia and Intensive Care Medicine will be presented.

SPONSORSHIP IS LIMITED TO MAXIMUM 1 SPONSOR PER PODCAST
This is a series of 30 minutes lectures on latest articles, research, papers and guidelines published in the last 12 months. In each episode the speaker will focus a different topic. In 2022 we will release 10 lectures and ensure a follow up.

Hot topics in Intensive Care lectures will be released once a month and free for all ESAIC members, paying for nonmembers and will be available in the ESAIC Library.

LIVE ON FACEBOOK

LIVE on Facebook is an initiative led by the ESAIC Trainee Committee, which is made by a lively group of young doctors and aims at creating learning opportunities for anaesthesiologists at the beginning of their career. This is an opportunity to inspire and educate Trainees throughout Europe and beyond in different and important aspects of anaesthesia and intensive care. With the help of the social media platform Facebook we will be able to broadcast a live Zoom meeting conversation that will be made available on the ESAIC library and reach thousands of individuals.

- Mention of the sponsor’s name at the end of the Live on Facebook session
- Logo on the Library, where the session is hosted

SPONSORSHIP IS LIMITED TO MAXIMUM 1 SPONSOR PER EPISODE

This manual is updated regularly. Changes can occur due to Covid-related measures. All sponsorship must be Unrestricted Grants. All the programmes are preliminary.
Events
In 2022, ESAIC is planning to organise face to face events, but attentively following the evolution of the pandemic. As a medical society made of professionals sworn to protect, support and save lives, ESAIC takes the dangers of the pandemic very seriously and consider ourselves responsible for the health and safety of our attendees, staff, and the public.

Although events are planned face to face, we will assess the feasibility of each event closer to the date and switch to online (or cancel the event) in the case the situation will not allow us to go ahead with the face-to-face event.
FOCUS MEETING IN PERIOPERATIVE MEDICINE – The myocardium
28-29 October 2022 – Barcelona, Spain

The Focus Meeting is a traditional Autumn appointment for the ESAIC Community. Each year, a different topic related to Perioperative Medicine is the Focus of the congress.

Next year’s Focus Meeting will spotlight the perioperative care of patients at risk for myocardial damage occurring after noncardiac surgery. The new developments in the understanding of this disease, its consequences in terms of perioperative morbidity and mortality, how the new monitoring techniques can help us in detecting the subjects at risk, and the potential therapeutic pathways that are being investigated will all be discussed. This two-day event will feature internationally recognised leaders in the field who will share their knowledge and expertise on these specific topics.

The contribution of international Key Opinion Leaders will provide a great opportunity to gain further knowledge of clinical practice and improvement of patient care. The congress will be supplemented by different session formats, traditional and interactive, to offer a wide range of learning opportunities of delegates.

The Focus Meeting will bring together about 250 experts in the field, who will have the possibility to learn, mingle and network with faculty and peers. The programme will be published in March 2022, along with a Sponsorship Manual for the Industry participation.

This manual is updated regularly. Changes can occur due to Covid-related measures. All sponsorship must be Unrestricted Grants. All the programmes are preliminary.
ISQ – INTERNATIONAL FORUM ON PERIOPERATIVE SAFETY QUALITY
Milan (Italy), 3 June 2022

The International Forum on Perioperative Safety and Quality (ISQ) is a joint initiative between the European Society of Anaesthesiology and Intensive Care and the American Society of Anesthesiologists, which first edition was held in Boston in 2017.

Both societies recognised the need for a dedicated forum aimed at increasing the availability of safety concepts and how to implement them into routine practice, especially with a focus on quality and practice improvement along the entire perioperative pathway.

The ISQ supports and energizes the movement for health care improvement while bringing together leaders and practitioners committed to improving outcomes for patients and communities.

This event explores how improvements in patient safety and quality will help to advance the health of individuals and populations. Attendees will hear about global perspectives, successful implementation of quality projects, and how to maximize learning from adverse events. They will also learn how to analyse success, how to engage stakeholders, and how to manage fatigue and care for second victims. The ISQ will bring the latest resources to help improve perioperative outcomes.
SPONSORSHIP INCLUDES:

- Recognition (logo and / or the wording ‘supported by’) in all communications about the ISQ and on the ISQ website and Euroanaesthesia website

- At ISQ meeting: signage (with logo) to the coffee break, lunch and reception areas and you can have pull-up banners in the catering ISQ areas

- 2 invitations to attend the event

- Recognition at Euroanaesthesia:
  - onsite signage
  - holding slides between sessions

- Recognition after Euroanaesthesia: ISQ article in the ESAIC Newsletter
The ESAIC Masterclasses are proposed in small groups (usually 20-30 persons). Lectures by well-recognised experts in the field alternate with group discussions and workshops in small groups (4-5 people in each group).

The list below includes the Masterclasses already planned in 2022, but it is not exhaustive as other Masterclasses may be added later in the year.

<table>
<thead>
<tr>

This manual is updated regularly. Changes can occur due to Covid-related measures. All sponsorship must be Unrestricted Grants. All the programmes are preliminary.
SPONSORSHIP INCLUDES:

- Recognition in our communications: name and / or logo in our eblasts and social media with link to company website
- Visibility on the website according to the UEMS rules
- 2 invitations for the Masterclass
- The results of the surveys we organise at the end of the Masterclass, where we seek both an evaluation of the event, but also perform a needs assessment for further development in education.
Grants and other programmes

This manual is updated regularly. Changes can occur due to Covid-related measures. All sponsorship must be Unrestricted Grants. All the programmes are preliminary.
Understanding that Europe has many world-famous Medical Schools, centres of expertise in anaesthesiology, intensive care and pain medicine, the ESAIC knew that these centres could provide a wide range of excellent training and therefore have made this possible for European Trainees to visit recognised centres in other European countries to gain experience, and return to their own hospitals in Europe to pass on their newly acquired knowledge and skills.
Every year the ESAIC Trainee Exchange Programme Committee selects the best (Trainee) applicants to visit, for a period of up to 3 months, the best European training centres. With grants sufficient to cover the cost of accommodation, living expenses, travel, learning and insurance in these centres, the ESAIC seeks to benefit and elevate trainees throughout Europe.

**APPLICATION SUBMITTED BY TRAINEES**

- Application period is open from Spring-Summer in the preceding year
- 3rd year residents to 3rd year specialist are welcome to apply

**GRADING OF APPLICATIONS**

- Trainee Exchange Programme Committee grades applications
- At the end of Autumn, the winners of the grant will be announced

**EXCHANGE (takes place in the following year)**

- Trainees will be matched with host centres and sign a Training agreement
- Trainees will carry out their exchange for up to 3 months

**POST EXCHANGE**

- Trainees return to their home country and hospital with new knowledge and skills to pass on
- Trainees write an article for the ESAIC newsletters sharing their experience

Companies can support trainees and recently certified anaesthesiologists to take part in the exchange via an unrestricted educational grant. ESAIC will select the winners based on defined criteria.

This manual is updated regularly. Changes can occur due to Covid-related measures. All sponsorship must be Unrestricted Grants. All the programmes are preliminary.
SPONSORSHIP INCLUDES:

- Recognition in our communications: name and/or logo in our eblasts and social media with link to company website
- Visibility on the website
- Mention of the sponsors in articles and/or presentations related to the programme
- Recognition at Euroanaesthesia - onsite signage at the TEP Networking event
- Invitation to the Networking event at the congress
TEACH THE TEACHER
MASTERCLASS PROGRAMME

The ESAIC recognises that the standard of teaching of Anaesthesiology and Intensive Care is a vital element of ensuring that our patients receive high quality safe care. Many Anaesthesiologists and Intensivists are involved in teaching not only those who work in University Departments, and not just Medical staff. The teaching of Operating Department Practitioners and nursing staff is often part of our work.

Although doctors receive a great deal of education, they are not often taught how to deliver education. Teaching is a skill and like any other skill it must be learnt and practiced. The role of teachers today extends beyond that of imparting information but includes also acting as mentors, facilitators, planners, developers and assessors. If those providing the teaching and creating the learning environment are not trained or qualified, the success of any educational program may be compromised. The teacher is responsible for the implementation of the educational process. Additionally, teaching skills may be seen as one of the competences of any Anaesthesiologist and Intensivist.

To address this need the ESAIC has developed the Teach the Teacher course for Anaesthesiology and Intensive Care Specialists to improve their teaching skills, where participants meet physically for 1 week, return home and conduct 6 months of online education, before closing this course with a final physical meeting of 1 week.
### Application Process

This manual is updated regularly. Changes can occur due to Covid-related measures. All sponsorship must be Unrestricted Grants. All the programmes are preliminary.
SPONSORSHIP INCLUDES:

- Recognition in our communications: name and/or logo in our eblasts and social media with link to company website
- Visibility on the website
- Mention of the sponsors in articles and/or presentations related to the programme
- Recognition at Euroanaesthesia - onsite signage
ESAIC LIBRARY

ESAIC Library is the platform dedicated to all on demand content, other than webinars and microlearning modules. In 2021, the Library attracted 39 thousands visitors, (excluding Euroanaesthesia 2021 visitors). This is the perfect opportunity for companies to sponsor to support education and get a great visibility.

European Society of Anaesthesiology and Intensive Care (ESAIC)
www.esaic.org

The European Society of Anaesthesiology and Intensive Care (ESAIC) is the largest professional community of anaesthesiologists in Europe. The organization strives to promote the professional role of the anaesthesiologist and intensivist, maintain the highest standards of practice and patient safety, and foster an exchange of information by providing educational tools, research support and networking opportunities to members, colleagues, and partners.
